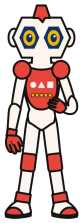
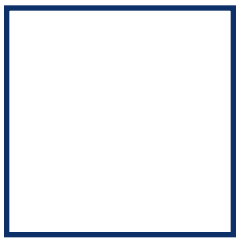
A square is a rectangle, too.



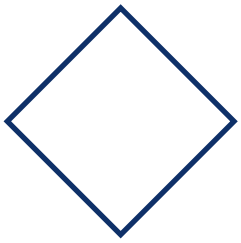
Trace, check, and connect the shape families.

Trace the sides. Mark each right angle with a little square.
Tick every family each outline belongs to. A shape can belong to more than one.



1. Square

2. Rectangle



3. Turned square

Family	**1**	**2**	**3**
Quadrilaterals: 4 sides	☐	☐	☐
Rectangles: 4 right angles	☐	☐	☐
Rhombuses: 4 equal sides	☐	☐	☐

A rectangle is a quadrilateral with 4 right angles.
A rhombus is a quadrilateral with 4 equal sides.
A square fits both descriptions. Turning it does not change its families.

Show why: use matching side marks and right-angle marks above.
